

Technical drawing of a circular mechanical part. The drawing shows concentric circles and a central heart-shaped hole. Key dimensions and features include:

- A vertical dimension of 45.5 on the right side.
- A 30-degree angle indicated at the top right.
- A horizontal dimension of 16.2 for the top part of the heart-shaped hole.
- Two diagonal dimensions of 51.1 for the sides of the heart-shaped hole.
- A horizontal dimension of 51.1 for the width of the heart-shaped hole.
- Concentric circles representing the outer and inner boundaries of the part.
- Small circular features (possibly holes or mounting points) distributed around the perimeter.

$$\sqrt{x} \left(\sqrt{y} \cdot \sqrt{z} \right)$$
$$\sqrt{x} = \sqrt{\frac{\text{gedreht}}{R_{z16}}}$$
$$\sqrt{y} = \sqrt{\frac{\text{hochglanzpoliert}}{R_{z4}}}$$
$$\sqrt{z} = \sqrt{\frac{\text{feinstgedreht}}{R_{z4}}}$$
